

## What is the Procedure and Advantage of Porcelain Veneers?

[Dental veneers near me](#) are made using resin or porcelain and are like tooth-coverings. A veneer cannot be differentiated from a real tooth, as both of them look the same to the naked eye.

### **What is the procedure of veneers?**

**Porcelain veneer procedure** generally includes the finding and treatment arranging, planning, and holding of the veneer to your teeth. The first step of getting veneers involves consultation with your dentist to determine what you want to achieve with your dental procedure. Your teeth will be examined to ensure veneers are appropriate, and your **porcelain veneers specialist** will discuss possible limitations of the treatment.

- For porcelain veneers, your teeth need to be prepared next. Your dentist will need to remove approximately 0.5mm of enamel from the tooth surface which is approximately the same thickness as the veneer. Then your **dental veneer dentist** will make an impression of your tooth so a dental laboratory can use it to construct your custom veneers.
- Finally, your dental veneers need to be attached to your tooth permanently. Dental cement is applied to the veneer which is subsequently attached to your tooth.
- Most dentists will also schedule a follow-up appointment to make sure your gums are adapting and the veneers are bonded firmly. Each veneer is custom-made for each tooth, and they are attached to the front part of the tooth. The procedure will take almost 2 hours, and you can see the result instantly.

### **What are the advantages of Porcelain Veneers?**

The main advantage of **veneers in Houston**, and the reason for their use in cosmetic dentistry, is their ability to uplift the look of your teeth and smile. They are the perfect solution for most of your cosmetic dental problems.

- Over time, your teeth will lose their white color due to daily brushing, dental treatments, and foods. Some medicines can also change the color of your teeth. In such cases, porcelain veneers can be used to restore the lost glow and regain your confidence.
- The use of [lamine veneer](#) can also hide broken or eroded teeth. If your teeth have slight misalignment, using veneers is the perfect way to hide them. Even small gaps in between your teeth can be corrected using veneers.

- Porcelain veneers are very expensive compared to other methods of teeth whitening. Even though they are very durable, the veneers are vulnerable to cracking and chipping. In such cases, they need to be replaced as they cannot be repaired.

Your teeth may also become more sensitive as the enamel is removed. Regular dental check-ups are also necessary to ensure that they remain in good condition. Regular dental check-ups are a good practice to follow whether you have porcelain veneers, other **cosmetic dentistry in Houston TX**, or simply want to remain in good oral health.

### **What is the cost of porcelain veneers?**

Depending on the location where the procedure is done, the cost of porcelain veneers varies greatly due to this factor. For porcelain veneers, at some places, an amount of \$500 is charged.
