

How can you benefit from functional skills?

Even if we don't believe it, we utilise English and arithmetic on a daily basis! When we write letters or emails, converse on the phone with customers, or read a text or application form, we utilise English. Whenever we want to tell time, figure out how much something costing, or how much of specifically each ingredient we require when cooking, we utilise math. We use them nearly every day, therefore knowing how to utilise them is critical! Functional skills may aid in the development of your confidence, knowledge, and abilities in specifically these areas.

Functional skills are indeed also GCSE comparable credentials, so if you are not having a GCSE, they could actually be for you!

If you struggled in school or dropped out without completing your GCSEs, functional skills programs are just an excellent option since they are shorter than traditional GCSEs and you may study in the best method for you. We provide numerous alternatives to fit your specific learning style, whether you would like to study at home, receive one-on-one help, or join an advanced program.
