

COSMETIC DENTISTRY: A TECHNIQUE FOR SMILE TRANSFORMATION

There is nothing more important than a beautiful smile that can brighten a person's day. On the contrary, it can be quite embarrassing to show unsightly, damaged, or discolored teeth. To give you the confidence in smile there are many methods available presently that focuses on improving the overall health of your gums and teeth.

Cosmetic Dentistry refers to any type of dental work that leads to smiling restoration and improves the overall appearance of the teeth, gums, and bites. It focuses on improvement in color, position, shape, and overall appearance of the oral features.

Is cosmetic dentistry safe?

Cosmetic dental treatments are considered to be safe and effective. It not only improves the smile but also improves the overall appearance of the teeth and gums and makes them function properly and healthily.

Why is cosmetic dentistry needed?

Dentists suggest cosmetic dentistry to repair several teeth ailments and disorders including but not limited to;

- Missing tooth/teeth
- Cracked teeth
- Discolored or yellow teeth
- Crooked teeth
- Irregularity in the shape of the teeth
- Dental injuries

Types of Cosmetic Dentistry:

There are different types of cosmetic dentistry. A few of them are discussed below.

Dental Whitening: Teeth whitening is one of the simplest and efficient ways to get your teeth cleaned quarterly with the help of the professional. It is regarded as the least expensive way to get a healthy smile. Apart from looking for [teeth whitening dentist](#), you must pay attention to regular oral hygiene and home teeth whitening remedies. **Teeth whitening dentist cost** depends on every individual differently yet it normally ranges from \$500 to \$1000.

Dental Veneers: These are thin, custom made shells made of porcelain or resin to cover the anterior of the teeth. After the removal of ½ mm of the enamel, these shells are cemented to the tooth surface.

Dental Crown: It is also called a dental cap, which is a type of cosmetic surgery that covers the decayed or damaged tooth. Crowns offer support to the weak teeth and hold the cracked tooth together in one place. Crowns can be made from metal, porcelain, resin or ceramic.

Dental Bonding: This could be the right choice for you if you are dealing with relatively small dental imperfections and disorders like minor chips or thin gaps between teeth. Such procedures take one or two appointments. A colored composite resin is applied to the damaged teeth that cover the gaps.

There are many alternatives when it comes to cosmetic dentistry. This isn't a full checklist of procedures under cosmetic dentistry but sure gives you an idea about the approaches.

Many individuals are currently dealing with certain dental ailments. With the growth in medical science, there are many treatment options to correct smiles and restores healthy gums and teeth.
