

How The Braces Can Aid In Appearance?

Once upon a time, this was a common question that why people use braces. This question has many answers and reasons that vary from use to use and person to person. The braces are basically suggested by a dentist who wants to improve orofacial appearance. Persons who have incorrect jaw position, crowded teeth, a disorder of jaw joints, underbites or overbites, etc. are advised to take help from braces. Braces give proper shape to the jawlines and improve the appearance of teeth. Again, people who face difficulty sometimes due to improper alignment of teeth, they take the help of braces, and after proper alignment of teeth, no need to use it. A permanent structure of teeth can be built with the braces.

Most of the people also prefer clear braces to bring a beautiful smile on the face and also to maintain good oral health. Coming to talk about **tongue crib**, it is a tool that is placed at the top front of the mouth who have developed teeth muscular, jaw or skeletal abnormalities due to thumb and finger sucking or tongue thrust. This basically happens to kids and school going boys and girls. This device is made of two bands connecting with a wire that stops the tongue from pushing the teeth forward or blocks the thumb being in the mouth easily. Sometimes, the kids or children may feel sore at the initial days but after some days, they will be used to of this habit and will not feel so.

It is very comfortable to use this appliance as it is removable also. This is why, this tool is designed to modify the tongue movements or to stop the old habits. Many parents have doubts whether this tool will be effective for their child or not. The good news is that it is really effective to stop the habit of tongue thrust.
