Balloon Arch

The balloon arch is a classic way to add life to your wedding decoration. The simplest way to make them is to borrow a pre-built metal wedding arch. If it is not available, create it using a strong bendable metal wire. Ensure that it is strong enough to stand on its own. After placing the arch, just attach inflated balloons onto the arch with wire ties or string. Make a uniform look of the balloon arch by starting at the top and working your way down both sides evenly. It is important to consider that the more balloons you will attach, the better arch will turn out.

The designed arch can be used outside the entrance to the ceremony so that when guests walk through the arch, they can feel the decorations. Also, you can use several balloon arches to highlight the entry of the bride.

Balloon Centerpiece:

One of the best places for wedding balloon decorations is on reception tables.
