

What Is The Difference Between Air-Filled And Helium Balloons?

Many of us know the differences between helium and air-filled balloons, but can we explain it to others? What we say is one balloon is filled with helium gas, and the other is filled with air. We cannot exactly explain the particular differences. It is essential to know the exact differences. If you are preparing to buy [balloon for party Brisbane](#) decorations and want to assure that you acquire the appropriate variety. You should know which you should choose and why. To get the best **balloons Brisbane** and **balloons gold coast**, search **balloon decorations Brisbane**.

Helium gas is used for filling the balloons because it is lighter than air, that is why helium gas balloons rise.

Here are the differences.

- **Lasting Time** – Latex balloons filled with helium usually lasts for about 8 to 10 hours. Helium-filled foil or Mylar balloons last for about three to four days. Though meanwhile taken the balloons outdoors, the display time diminishes highly because of the increasing heat rate at which the helium escapes. Balloons filled with air could last much longer. This happens because the helium particle is very small and easily leaves the balloon material. Looking for **balloon decorations Brisbane**, search for **balloon decor Brisbane**.
- **Cost** – Typically, balloons inflated with helium gas are much more costly than the balloons filled with air, considering the fact that helium balloons float and air balloons do not, helium balloons are worth purchasing.

- Messages, and Designs – the similarity between the two types of balloons is that both of them could be improved and designed with written messages, and designs. However, while Mylar balloons filled with helium come in unique shapes like animals and other characters. But, there are limitations to the patterns possible for latex balloons. For kids birthday parties particularly mylar balloons are the best. Get affordable **birthday balloon Brisbane**, find out **balloons Brisbane**.

- Refilling – Latex balloons that are once tied off and filled with air could not be refilled. But, helium Mylar balloons can be refilled with more helium when they start to flatten. Get **balloons gold coast** at your doorstep, only search for **balloon delivery gold coast**.
- Substance – other than the balloons filled with air, helium gas balloons is packed with an unscented, transparent, and dull natural gas. Want to know about the organic balloons, find out more by searching **organic balloon gold coast**.
- Density – as helium gas is lighter than air, helium gas balloons rise and float, whereas air-filled balloons do not. Therefore, investing in helium gas balloons is more popular. Looking for helium balloons near you, just search [helium balloons Brisbane](#) and **helium balloons gold coast**.
