

# What Are The Different Types Of Balloons?

If you are buying balloons for a party or an event, do you know there are different types of balloons? It is not going to shop and asking for any pack of balloons, you need to purchase the best type of balloon according to your party or event, so you do not feel embarrassed because of the decorations. Balloons are eye-catching, loved by both kids and adults, and also has a very large print area where your logo or message can be visible even at large distances. To best represent the central varieties of balloons and how they're different from each other, it is best to know the characteristics of each balloon type. Find balloons perfect for your occasion at [party balloons Brisbane](#) and **party balloons gold coast**.

## Types of balloons

1. Latex Balloons - These balloons fill to an oval shape, are made of recyclable latex, and are efficiently customized for printing logo, line, or any artwork design. They are normally available in sizes ranging from 9 to 18 inches. The most basic and common size is the 11 inches latex balloons. Generally, latex balloons are filled with helium, which usually lasts from 10 to 14 hours. Purchase **party balloons Brisbane** for **balloon decor Brisbane**. Latex balloons are additionally very elastic in the thought that they can be used without helium too. You can easily fill latex balloons with regular air with the help of an air inflator, foot pump, or a hand inflator. That is why they are used as home **birthday balloon Brisbane**.

2. Mylar Balloons - Mylar balloons are more costly than latex balloons, but there are good reasons for this. They are higher quality balloons with a metallic look. An adorable, colorful, sparkling sailing mylar balloon gains all the attention. Mylar balloons are also termed as foil balloons, they cannot be used with balloon cups and sticks, rather with ribbon or threads. You have to be very particular, when shopping

for mylar balloons. Inexpensive, inferior quality mylar balloons will not be the best deal, because these balloons will have very little float time and have high levels of risks of defects. While shopping for mylar balloons, try finding balloons with self-sealing flaps which is a very convenient feature. Also, mylar balloons use less helium gas. This action permits to fill up to 30% more balloons per helium tank, which in turn saves on helium costs. Find out more at [helium balloons Brisbane](#) and **helium balloons gold coast**. The mylar balloons could be personalized in 4 different shapes round, heart, star, and square. They are available in almost every color possible, so locating the correct colored mylar balloon for advertisements, occasions, or party theme is never a problem.
