## Pros and cons of this surgery

- This is a cosmetic surgery to remove excess fat from your body. Therefore, like any other surgery, your health and allergic reactions to anesthesia, etc. are tested before taking you in for this surgery.
- Once the liposuction surgery is performed to remove fat, there is no guarantee that you will not gain weight again. This is not a one-time solution. Also, you should take an idea about how much is [liposuction](#) before underdoing the surgery.
- Even if you are fit and healthy and want to remove fat only from certain parts of your body, such as the abdomen, thighs, hips, etc., then you can go for this surgery.
- Ideally, anyone who has a little fat that is visible can go for this surgery.
- If you are anemic, or have any problems concerning blood circulation or have any chronic health ailments, then, this surgery is not recommended for you.
- These Liposculpture surgeries cost anywhere between two to five thousand dollars for a single part. If you want to go for multiple areas, then the cost will go up, especially, if you are obese.
- The cost of this surgery does not have any fixed or standard rates. The cost may vary from location to location.
