

What are the Benefits of Dermaplaning and How Much does it Cost?

Every person has their unique skin type and concerns. Dermaplaning is a safe procedure that has been included in medical SPA facilities for a long time by experienced practitioners through the **dermaplaning Boston** well-trained experts. Dermaplaning is created primarily to remove vellus hair, the type of hair that is normally referred to as 'peach fuzz', a very fine hair that the body develops to stay mild. Dermaplaning also is a simple shaving of the skin. It's particularly useful for those people who have dry or rough skin texture. The treatment is an active physical exfoliation method. It necessitates the use of a sterile, surgical scalpel to gently shaven or remove hairs on the skin's surface.

Dermaplaning can be conducted every 3 to 4 weeks and typically removes several weeks of dead skin cell buildup. The dermaplaning procedure must be performed by a licensed specialist dermatologist or plastic surgeon and thus it is more relatively safe on most skin types. The treatment process is very fast and it is painless.

What are the [benefits of dermaplaning](#)?

The benefit of dermaplaning is that-

- Dermaplaning exfoliates our skin and aids in healthier cell regeneration, it also allows products to penetrate the skin better.
- Helping to rid the face of excess fine hairs which can often accumulate dirt and oil.
- Exfoliation of dead cells with the removal of fine hairs results in healthier, feels smoother and more refreshed, and radiant skin
- Helps exfoliate the skin with broken capillaries
- Offers better results than traditional microdermabrasion
- Little downtime
- Skin is only slightly red and increased after the treatment
- Can temporarily remove fine, downy hair with ease

- Performed just like shaving
- Can be performed with a chemical peel
- Increases absorption of topical products
- Immediately diminishes the appearance of fine lines and wrinkles
- Primes skin for a chemical peel
- Creates the healthier, more radiant appearance
- reducing the appearance of acne scars.
