THE SIGHT FROM OUR WINDOW

COURSES OF OUR SCHOOL

- TECHNICAL education technology sector-Address "SISTEMA MODA"
- Industry and Crafts for Made in Italy FASHION PROFESSIONAL
- Industry and Crafts for Made in Italy Articulation Industry, CHEMICAL area Professional
- Auxiliary arts of health professions:DENTAL TECHNICIAN PROFESSIONAL

WHAY WE DO?

FASHION PROFESSIONAL:

Fashion Design - Students learn how to create collections, develop design ideas and make sketches for clothes and accessories. This also includes the study of the human figure and proportions for fashion design.

Dress Making - The program includes practical courses in tailoring, sewing and garment packaging, where students learn how to transform a design into a finished garment using various materials and processing techniques.

Modeling and Patterning - A crucial aspect of the training is the creation of patterns. Students learn to develop models that serve as the basis for the creation of clothing.

Study of Fabrics - Knowledge of the different types of fabrics, their physical and chemical properties, and how these can affect the choice of material for each garment.

History of Fashion - Students study the evolution of fashion and the main fashion designers and movements, from the origins to the present day, to understand the cultural context of trends and stylistic changes.
