

Is Veneer Tooth Effective For Maintaining Oral Health?

To take care of the teeth, many of us choose the [mouth guard](#). This is a tool that is used to save the teeth and gums by stopping and overcoming injury to teeth, lips, arches, gums, and gums. Its prime role is to minimize the risk of broken teeth and injuries to lips, face, tongue, and jaw. This tool can be used by anyone but especially those who are associated with sports like football, boxing, ice hockey, soccer, lacrosse, basketball, and field hockey. Again some people use night guard also that helps in morning headaches for jaw pain relief and protect the teeth.

We often see a tooth with a portion of it missing. Such a kind of half tooth or broken tooth can be brought into shape with the help of **veneers**. It is a tool that is placed over a tooth that is made of special material like porcelain and resin composite material. The main purpose of using this tool is to bring a beautiful smile and add in appearance. It is permanently bonded or fixed to teeth. It also saves a tooth from being damaged as it works as a cover for the tooth. This tool is very beneficial to give a good shape to a tooth.

Take no worries as this material does not harm and affect the tooth but yes, a person looks beautiful with **veneer teeth**. This material lasts for about 10 years, and if proper care is taken, it can last for more than 10 years. Most of us feel the value of this tool and always appreciate the process that is very effective in increasing beauty. A good care of this tool increases its longevity but do not think that it can not fall off. In most cases, this tool works successfully but you can not deny that it will always work like that. But the chance of falling down is very less. That is why every dentist asks the patients to a good and proper care of it.

When you search for **veneers cost**, you will get different answers as the cost depends on the location and the dentist also. If a senior dentist does the treatment, the cost will obviously higher and if the location of the clinic or the dentist is in a place which is easily reachable,

then in that case you can expect the same. Sometimes it depends on the condition also. If you need the treatment on an urgent basis, the cost will automatically be high. And if you have some time in your hand that you can delay the treatment, the cost might be lesser and you can search for ample number of dentists near your place.

Now coming to discuss **tooth crown**, it is a device that is basically placed at the top of a tooth. That is why it is called a crown or cap that plays a vital role to protect a tooth from external injury and other factors. This device gives shape to a tooth externally both to give a good appearance and safeguarding from many oral problems.
