

What Are The Most Frequently Asked Questions About Invisalign?

[Invisalign Clear Braces](#) is one of the best ways to enhance your smile and straighten your teeth without using metal braces. It is a series of custom-made, clear braces that slowly change your teeth' position and shifts them to their position.

They are less noticeable than traditional braces and can be easily put on and off while eating or drinking. They are easy to clean and do not require extra care.

Many people think they can only create a beautiful smile with the help of these traditional braces, but now there are more enhanced options for treating your misaligned teeth. With Invisalign clear braces, no metal brackets or wires will dull your beautiful smile. In this treatment, you will be comfortable during the whole treatment procedure.

Because it is less noticeable, it has become a prevalent orthodontic treatment your [Invisalign Houston](#) dentist or orthodontist may recommend to improve your teeth alignment. You may think of many questions, and here are the answers to feel comfortable if you opt for Invisalign.

Is Invisalign better than traditional braces?

Invisalign is considered better by people because it is less noticeable, and they are clear aligners much more comfortable and easy to remove and place again. Your dentist may teach you how to remove and put it back again. The big reason is **that Invisalign Clear Aligners** take less time compared to traditional

braces, and no sharp ends can hurt your mouth. There are fewer visits to the dentist as broken wires and brackets are not a problem in Invisalign.

How does Invisalign work?

The dentist will provide you with a clear tray and place it into your mouth, and slowly the Invisalign will help you move the teeth in proper alignment. The aligners will be changed with your treatment as there will be differences in your teeth after the first placement of Invisalign.

You will have the trays with minor changes to fit your new straightened teeth.

How much does Invisalign cost?

The cost may vary with your treatment plan and the severity of your case, depending on other factors. [Find A Dentist Houston](#), consult your treatment plan, and discuss the cost and treatment.

Can both adults and children use Invisalign clear aligners?

Yes, Invisalign can be used for both kids and adults. Your dentist may ask for traditional braces for your child because of their age. Invisalign is much better for adults as they don't prefer braces at a young age, being embarrassed about their appearance.

How long Invisalign takes to straighten the teeth?

The period may vary according to your treatment and severity but mostly from 12 to 18 months if you have a more severe case. Generally, it ends up in 6 months for mild cases.

Can I change from braces to Invisalign?

It is possible, but sometimes it depends on the case and severity of the case. Your dentist will tell you by examining your case. The use of invisible braces is more effective from the beginning, and it may cost more to switch in the mid.

In Conclusion:

The only care Invisalign need is they should kept safely in case when you remove them to eat food. Invisalign is a better option to treat your teeth, but it may cost more than traditional braces. Call or visit [Top Dentists In Houston](#) for more details.
