What To Look Into a Point-of-Sale System?

By POS Central India

What is Point Of Sale System

A [point-of-sale system for retail](#) consists of a computer display, a cashbox, a scanner, and a printer. And all these devices are set on a large sales counter with ample space for keeping goods. Your sales output, salesmanship, and customer care service largely depend on the functioning and features of the system.

Components of an Effective Point of Sale System

A [Point-of-Sale system](#) must contain following components:-

1. Computer Monitor screen that displays data
2. A cashbox fixed under the computer for keeping cash
3. A scanner for scanning product barcodes. It could be a handheld device or a fixed unit
4. A small printer for printing bills for customers

Factors to Choose Computer Display

Choose a display of an appropriate size. Visit all leading [POS system suppliers](#) to get more options. Consider the following factors to choose a display.

- ❖ The screen should be visible from a 2-3 feet distance. A screen smaller than 15-inch would require you to go closer to the screen for working
- ❖ A screen bigger than 15-inch will consume more space and make your sales counter look congested

Advantages and Disadvantages of Touchscreen Display

Choose a touchscreen feature for your display so your [POS system](#) becomes fully functional. Also, you should be able to take full advantage.

- A. Touchscreen display is the latest and the most popular
- B. It is easier to enter details on the computer using touch-sensitive buttons
- C. Touchscreen function enhances capabilities and performance in the long run

Disadvantages of touchscreen

- a) Rough use could disable touch functions
- b) Touchscreen display could cost more than the conventional computer

Hardware and Connectivity Options in a POS System

POS
CENTRAL
India

Consider the hardware and connectivity options so you are comfortable with your system. [Buy a POS system online in India](#) that can accommodate your present as well as future needs.

- 4GB RAM is the norm today
- Don't with less than 4GB flash memory
- 64GB is the ideal digital storage capacity of the device
- 64GB hard drive is sufficient for convenient working
- Multiple USB ports will be needed for connecting several peripheral devices

Assurance of Point-of-Sale System

Try to get the maximum guarantee to secure your investment on your [point-of-sale system for retail](#) selling. Usually, you will get a 1-year onsite warranty with the system.

- Guarantee gives peace of mind that you will get quick help in troubled times
- Read terms and conditions of guarantee so you understand what is covered and what is left out
- Look for options to extend the guarantee cover to get peace of mind
