Which Is The Best 1D Barcode Scanner?

By POS Central India

Why Should You Buy A Laser Scanner?

Most retailers **buy 1d barcode scanners** that work on laser technology. It is the latest technology used in scanning barcodes. Here a laser serves as a light that reads all linear codes. The light travels through a series of mirrors and falls on the barcode.

- Laser scanners can read codes even from two feet
- It works faster than other devices as laser light travels fast
- Laser scanners work much better than others

The advertisement features a black and orange handheld barcode scanner centered within a white circular frame. The background is white with green accents at the top and bottom. The text is in bold, black and green fonts. A red button with white text 'SHOP NOW' is located at the bottom right of the scanner image area. The contact information '1800 419 5553' and 'WWW.POSCENTRAL.IN' is at the bottom right of the entire advertisement.

The [TVS BS-L100 PLUS USB barcode scanner](#) is a device that is used to scan barcodes and capture the information contained in them. The scanner is designed to be easy to use, with a simple point-and-scan interface that allows users to quickly capture the information they need.

- ❖ Speed: 300 Scans/sec and can read 1D and 2D barcodes
- ❖ Interface: USB
- ❖ Compatible with operating systems, including Windows, Mac OS, and Linux.
- ❖ Highly durable, reliable and versatile, with a rugged design

What Are Other Types Of Barcode Scanners?

Image scanners are the other types of scanners available in the market. They use digital cameras for barcode reading. But their reading ability is limited to a few inches. While Honeywell models are doing well, retailers prefer **Honeywell Voyager 1250G Barcode Scanner** without a stand.

- Image scanners can read codes only at a distance of a few inches
- They are slower in comparison to their laser counterparts
- Honeywell also makes laser scanners

The advertisement features a black Honeywell Voyager 1250g Single-Line Barcode Scanner centered within a white circular frame. Above the scanner, the logo for POS CENTRAL India is displayed, with 'POS' in green and 'CENTRAL' in black, and 'India' in a black box. To the right of the scanner, a green circular callout contains the text 'Honeywell Voyager 1250g Single-Line Barcode Scanner' in white, with a red 'SHOP NOW' button below it. At the bottom right of the advertisement, the website address 'www.poscentral.in' is written in white.

How Do 1D Laser Barcode Scanners Work?

Laser is only a technology employed for reading barcodes. And it is the design and builds quality that enhances the ability of a scanner. [1d barcode scanners](#) flash laser on barcodes, and you can conveniently flash the laser from a distance.

- Point the scanner to barcodes and flash the laser light
- The scanner will pick up the light reflecting from the codes
- The information will be decoded and sent to the attached POS

What Are The Drawbacks Of Laser Scanners?

Like every device, laser scanners have some drawbacks, but still, retailers [buy 1d barcode scanners online](#). A laser scanner has a series of mirrors that can break on colliding with a hard surface.

- Latest-design laser scanners come with the improved built quality.
- Only high-quality mirrors are used in laser scanners.
- Limited barcode types: read-only 1D barcodes and not be able to read 2D codes, such as QR codes.
- Limited scanning distance: up to around 20cm.
- Limited field of view: can only scan one barcode at a time.
- Light sensitivity: difficulty scanning barcodes in low light conditions or if the barcode is not printed clearly or at high resolution.
