

-
- Figure 1 is a plan view of the test section. It shows a rectangular layout with various dimensions and flow paths. The overall width is 80 inches (2032 mm) and the overall height is 12 inches (305 mm). The flow direction is indicated by arrows, entering from the top and exiting from the bottom. The diagram includes several internal rectangular areas labeled 'V' and 'U', and a central area labeled 'B'. Dimensions are provided in inches and millimeters in parentheses.

FIGURE 5

- On materials:**
We recommend oak or mahogany, although lesser grades could be used. The 1x4 should be totally free of knots and made of hardwood.

We recommend oak or mahogany, although lesser grades could be used. The 1x4 should be totally free of knots and made of hardwood.

-
- Technical drawing of a rectangular frame. The overall width is 22" (559) with a tolerance of $\pm 1/4"$. The overall height is 32" (813) with a tolerance of $\pm 1/4"$. The inner opening width is 10 1/4" (260) with a tolerance of $\pm 1/4"$. The inner opening height is 16" (406) with a tolerance of $\pm 1/4"$. The drawing shows a cross-section of the frame with a central opening and a dashed line indicating the inner boundary.
