

How To Build A Coatrack

Here is a simple coat rack plan:

Materials

- One Piece, 1 x 10 pine board @ 30"
- 1/8 pound, Wood Screws @ 1"
- 1/2" pegs
- Sandpaper
- Interior paint or polyurethane

Step 1: Cut the Piece to Size - Select the 1 x 10 x 30"

- Crosscut the board to desired size
- Copy the pattern, as shown above
- Using a band saw, cut the board to size and sand, as shown above

Step 2: Drill Holes - Decide the Peg placement and mark the locations on the board

- Drill 1/2" holes for the pegs, as shown above
- Glue the pegs into place
- Reinforce each peg with a screw drilled from the back of the board
- Drill two, 1/8" holes, 16" on center to hang the coatrack, as shown above

Step 3: Finish the Coat Rack - Select the completed rack

- Paint or polyurethane
