

There are none in New Zealand,
which makes you feel safe when
you walk in the forest!

You will find some unique species
of this animal in New Zealand, some
of them even fly from Australia.

1.

2.

It is full of vitamins... but it is also
the way people call themselves
in New Zealand!

Environmentalists are happy that
there is none in the country.

3.

4.

There are so many of them every year
that students learn some emergency
procedures at school.

You will have to swear it if you decide
to become a New Zealand citizen
one day...

5.

6.

One third of the country
is covered in them.

A great number of them are made
in New Zealand because the scenery
is so spectacular!

7.
