

## Latest Treatment Options To Cure Varicose And Spider Veins

When suffering from spider or varicose veins, getting the treatment becomes a necessity and must be done as early as possible. If you are seeking to enhance the look of your legs by getting rid of those unattractive blue, red, or purple veins on the ankle joints, calves, and thighs, then Sclerotherapy might be appropriate **Vein Treatment California** for you.

Sclerotherapy uses a chemical solution that triggers the unwanted veins to collapse and fade away. Using Asclera, an FDA approved sclerosing medicine, a certified vein doctor uses a secure, effective, as well as fairly pain-free [Vein Treatment San Diego](#) that gets rid of a spider or varicose veins. Give your legs the look you have always wanted and get rid of those unhealthy veins with the best varicose and/or **Spider Vein Treatment San Diego**.

The spider and/or [Varicose Vein Treatment San Diego](#) is performed comfortably in the doctor's clinic. Your vein doctor will identify your situation and prescribe you a tailored treatment as well as might do the procedure the same day.

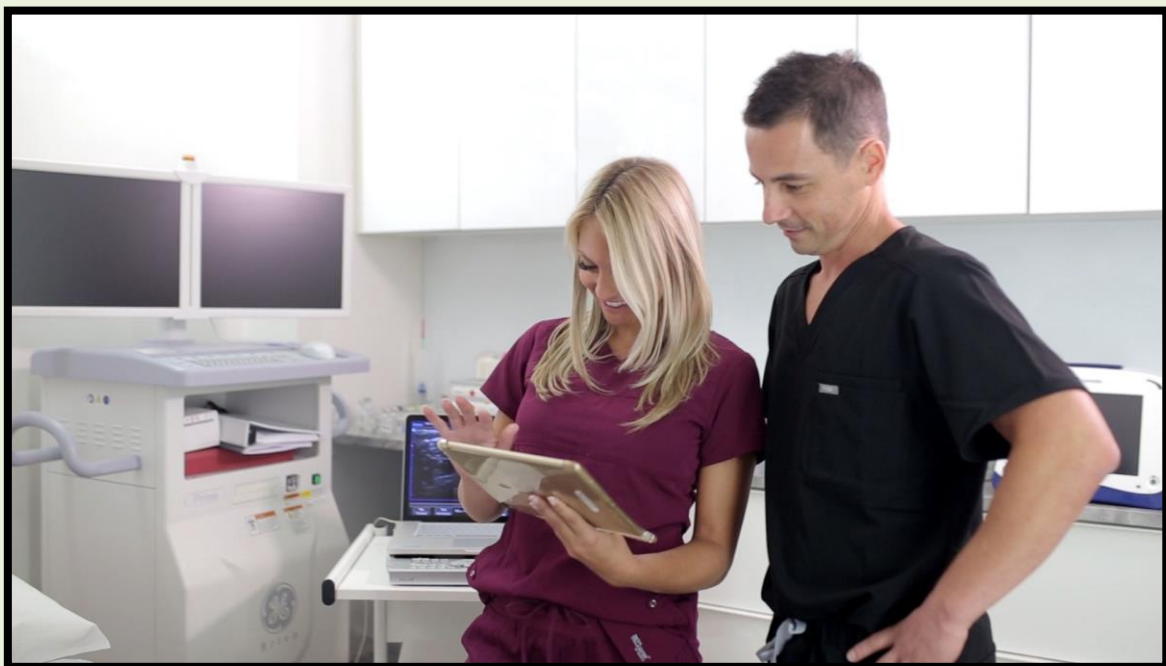

As a piece of advice, it's best to stay clear of pain killers, anti-inflammatory medications, other than prescribed by the doctor himself and quit alcohol & cigarette smoking.

Before going on with your varicose and/or **Spider Vein Treatment SD**, the doctor will examine and review your case history. This consists of:

- why you want the treatment and the preferred outcome;
- a comprehensive focused evaluation of any present clinical conditions,
- medicine allergies,
- family history of venous insufficiencies,
- alcohol and/or cigarette addictions, and
- previous treatments performed near the location to be treated.

The physician will certainly analyze your capillaries thoroughly, advise a therapy course, discuss the likely end results, as well as review any threats or potential problems. If you are a great prospect, you will certainly be asked to sign therapy consent, and after that, your doctor will proceed with the spider/**Varicose Vein Treatment California**.

### **Sclerotherapy: The most effective Vein Treatment**

Sclerotherapy uses a sclerosant agent, which is injected right into the vein without the need for anesthetic. The unhealthy veins eventually fade from sight. The common time for therapy is 15 - 45 minutes. At the completion of the treatment, you will certainly be asked to wear a compression hose. Except for bathing, you will certainly put on the garment constantly for the next 3 days and afterward just during the daytime for the next 2 weeks. You can certainly go residence quickly after the treatment is done.

### **Recovery Period**

On the whole, spider & [Varicose Vein Treatment SD](#) is really secure and connected with a reduced likelihood of possible problems. You are encouraged to walk. You will get rid of any type of dressings and can begin bathing the next day. You may really feel pain, which is typically momentary and does not call for prescription medicine. You are able to drive as well as carry on with normal tasks besides strenuous workout, extended durations of standing or sitting, long travel, sunbathing, and hot baths or saunas for about 2 to 4 weeks.
