

Let's Go Green, There is No Planet B!

Summary

The purpose of this research document is to explore the topic of environmental protection, sustainable living, and the initiatives undertaken by our school in the context of the Erasmus+ project "The world of the tree". We aim to investigate the environmentally friendly practices implemented at our school and the individual actions each student takes to contribute towards a greener future.

Research Methodology

To gather data for this research, a survey was distributed to all students in Year 4. The survey consisted of questions related to environmental protection, sustainable lifestyle choices, and the involvement of our school in promoting eco-friendly practices. The survey was designed to assess the knowledge, awareness, and actions of our students in relation to environmental sustainability.

Survey Questions

1. Are you familiar with the Erasmus+ project "The world of the Tree" that our school is participating in?
2. What is your understanding of environmental protection and sustainability?

3. Do you believe in the importance of adopting an environmentally friendly lifestyle? Why or why not?
4. What eco-friendly practices have you personally adopted in your daily life?
5. How has our school promoted environmental awareness and sustainability?
6. Are you aware of any specific initiatives or projects related to environmental protection implemented by our school?
7. How do you think we can further improve our efforts to protect the environment?

Research Data Collection

The survey was distributed to all Year 4 students, who were asked to complete it voluntarily. The data collection period was from 12/2022 to 02/2023. The responses provided by the students were collected anonymously to ensure privacy and encourage honest participation.

Data Analysis

Once the survey responses are collected, the data will be analyzed to identify common themes, trends, and patterns. The results will be summarized and presented in a comprehensive report to provide insights into the environmentally friendly practices adopted by our school and the individual efforts of our students.

Research Conclusion

By exploring the initiatives taken by our school and the actions of our students towards environmental protection and sustainability, this research aims to assess our collective impact and identify areas for further improvement. The findings will help us understand the current state of our school's eco-friendly practices and inspire us to continue our journey towards a greener future.
