Resources

Paper, colour pencils, watercolour paints, felt-tip pens, crayons and pencils.

Workflow

An important element of the work was design and technical freedom, but you could only use your imagination (copying was not allowed).

As a teacher, I watched over the aesthetics and completion of work, and over the independence of young people.

We learnt to work with a project - a sketch and an individual discussion of these sketches, and finally materials and tools.

As you can see in the pictures below, the topic is extremely stimulating,

and the presented illustrations can be treated as subsequent projects for something larger, e.g. a painting on canvas.
