

MY HAND AS A FAMILY TREE

Teacher Giedre from the Riga Lithuanian Secondary School gave a creative task to 4th grade students. Each student had to imagine that his or her hand was a tree. What does it look like, what are its branches? What kind of tree is that? Maybe oak or pine? In what environment does it grow? Does it need sunlight? Maybe birds live in its branches.

This creative work develops imagination, creativity and develops drawing skills.
