

# Growing Together: Fostering Environmental Curiosity in Early Education

## Objective

- **Educational Enrichment:** To provide a hands-on learning experience for preschoolers by introducing them to the world of plants and fostering an early appreciation for nature.
- **Environmental Awareness:** To instill a sense of responsibility and care for the environment in young children, teaching them about the importance of plants and their role in our ecosystem.
- **Interconnected Learning:** To enhance cooperation and exchange of knowledge among educators and students from different countries, promoting cultural understanding and shared experiences.
- **Promoting Creativity:** To encourage creativity and critical thinking in children by involving them in the process of planting and nurturing seeds.

## Description

The "Growing Together" Erasmus+ project aims to help preschool students to explore the wonders of nature through seed planting activities. Inspired by the quote, "*A tiny seed in the ground, like a secret treasure waiting to grow,*" this project seeks to create a shared space where preschoolers and educators alike can embark on a journey of discovery.
