

Candle wreath

Resources

To make the work I need: chestnuts, acorns, pinecones, fruits from shrubs and ornamental trees, newspapers, hot glue, ribbon about 5 cm wide, clear varnish.

Workflow

First, from the newspapers, form a circle of any diameter, but so that a candle can fit inside. Then we wrap the circle precisely with a ribbon. To the base prepared in this way we glue with hot glue gifts of the forest: chestnuts, pinecones, acorns and others according to taste. Be careful not to burn your hands, because the glue is very hot. The finished work should be thoroughly covered with a clear spray varnish. You can put a candle in the center and the decoration is ready.
