

Chestnut chase

Active play with tree seeds

Resources:

Chestnuts, a timer or a phone, good mood.

Preparation:

A room, classroom or outdoor space free of tree seeds.

Activity:

As many players as there are chestnuts are placed on the ground without touching each other. Players stand within 4 metres of the chestnuts. Each player has 20 seconds to pick up one chestnut. The chestnuts are collected from the players. After one chestnut has been taken out, they are placed back on the ground. All players have 20 seconds to pick up 1 chestnut again, but one player runs out of chestnuts and is out of the game. In the following rounds, one chestnut is taken out at a time until there is only one player left as the winner.
