

CONE DECOR

We will make a beautiful decor from cone.

For this creative work we will need the following materials:

- Dry cones (fir or pine cones);
- Scissors;
- Paintbrush;
- White guashe paint;
- Hot glue;
- String of plastic balls (or any other small decors up to you).

Workflow

Please find some fir or pine cones. Make sure they are dry (opened). If not, keep them warm in the room until they open.

First step - paint the ends of the scales of the cone with white gouache. It will look like the cone is covered in snow. Allow to dry.

Second step - Heat up the hot glue gun. Cut the balls from the string.

Third step - Glue the balls to the cone (you can certainly use any other delicate decorations and glue them).

Enjoy your new creative work! You can give such cones to your loved ones at Christmas or decorate your house to create a festive feeling!
