

# LOVE TREE

# LOVE TREE

## Summary

**In the common room on the occasion of "Valentine's Day", students from grades 1-3 of our Primary School created a "TREE OF LOVE". Our tree was created from small perfume atomizers that we have received to use for our creative works. We decorated the Valentine's tree with romantic, original accessories. We hid miniature graphics under a glass dome of transparent glass and used small stickers/hearts that we placed in round coin caps. We glued the whole thing with double-sided adhesive tape on a large, blue cardboard.**

## **Resources and workflow**

**We used silver atomizers, instead of atomizers, e.g. wine corks or tree twigs can be used to create a tree. To decorate the "TREE OF LOVE" we used: glass cabochons, glass glue, graphics with Valentine's motifs, plastic transparent coin caps, small heart stickers, double-sided adhesive tape and a large cardboard box.**
