

Summary.

We will make glass candle holders with a tree leaves decoration.

For this job, we will need the following materials:

- paintbrush;**
- white glue;**
- any tree leaves;**
- clear glass jar;**
- candle.**

Workflow.

Go outside and collect colorful leaves.

Take a glue with paintbrush and cover part of the jar with glue (as big area as the leaf of the tree).

Place the leaf on top, press it down.

Cover the top of the leaf with a layer of glue.

Continue to cover the outside of the jar with leaves and glue.

The empty spaces (if any) should also be covered with glue.

Leave the jar overnight to allow the glue to dry completely.

Put a candle inside and enjoy the dark winter evenings :)

Note.

The candle must only be lit in the presence of an adult.
