

Autumn masks

During their stay in the common room, the children created autumn masks. We used our own hands to create them. On a sheet of paper folded in half, we traced a hand, cut out holes for the eyes to create a mask, and decorated the whole thing with autumn leaves. It was useful to work with double-sided tape, scissors, markers and pieces of yarn/string to tie the mask on both sides. The work was easy to do, and the results... see for yourself.
