

Owl

Owl

Tools:

I used hot glue, drill, screws, saw. I also used a tree trunk, tree bark, fir and pine cones, thuja twigs, pine twigs.

Workflow:

I attached wings representing tree bark to the trunk with screws. Then I drilled a wooden head for the owl, and hot glued the wooden eyes on. I glued coffee beans in the middle of the eye. Instead of the nose, I glued a pine cone, and instead of the eyebrows, thuja branches. For embellishment, I glued a bark tie to the owl, which I decorated with coffee beans. The glued pine branches represent the owl's ears.
