Is it expensive ?

20 euros / window !!

Why is domotics an innovation ?

➔ Home automation rethinks life in your home, to make every action more practical.

A smart house is a home that has highly advanced, automated systems to control and monitor any function of a house.

You can control all the lights, all temperatures, screens, security, all windows and doors operations, air quality. It is either a necessity or a comfort option for the residents.

It's an efficient way to save time and money,. It's a way to improve life quality. That's why it's a great innovation.
