Loïc coquille  
Timo Leguedois  
Maylisse Mallart

## Netherlands and Luxembourg

Joris Franke  
Jelmer Gerretzen  
Dominic Petesch

## Germany

Anna Lena Goellner  
Laura Bekker  
Ida Savor

# LTA SCHOOL VISIT

## 1st stop

On the second day of Carrefour we started the day with a visit to Lta, where our Luxembourgish Students and Teachers showed everyone around. We started in the Banquet Hall where we got sorted into our teams.

we went to see the Library with a view to the street and where we have luxemburgisch, french and german books to rent and multiple computers.

## 2nd Stop

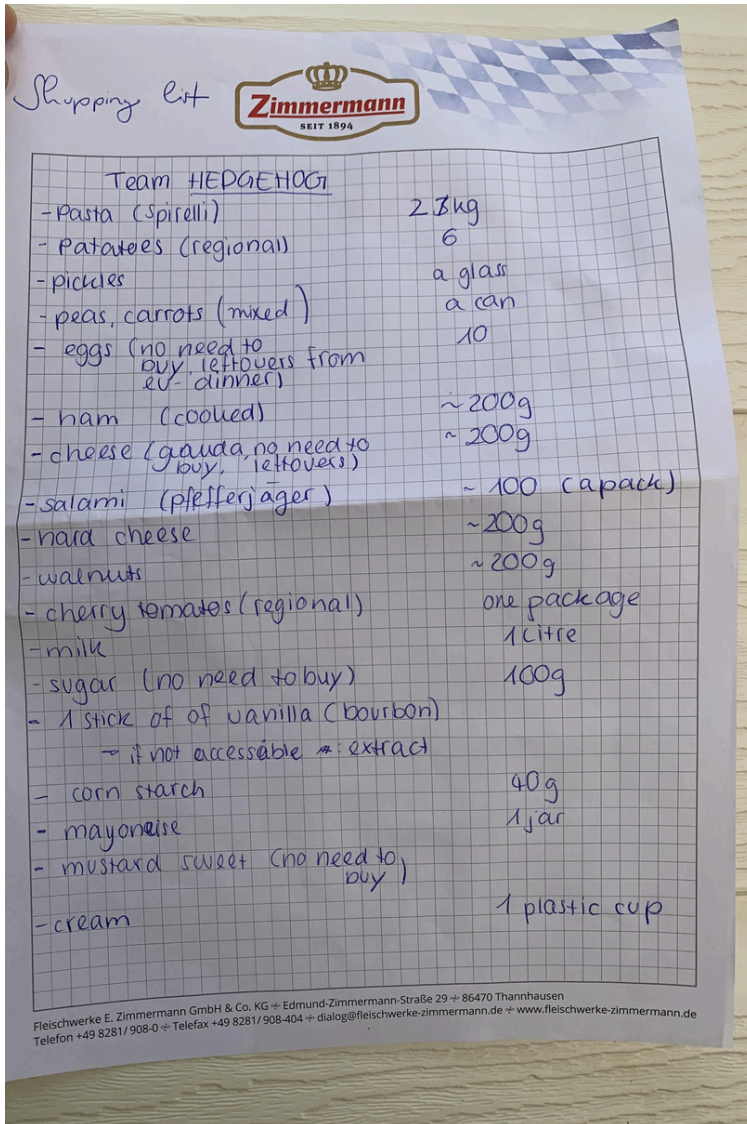

After that we continued our way to one of the classrooms where we showed them what a typical Classroom looks like.

## 3rd Stop

We got downstairs to the basketball court and around to the back of the School. There we went to the Storage and Atelier of the Students.

# FOOD, FOOD, FOOD

We had to find the recipes on our own to create the salads

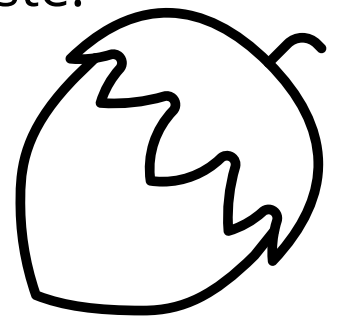

We made two different pasta salads for the meal, a salad from France, a salad from Germany and Luxembourg, we also had a dessert from the Netherlands.

# ZERO WASTE WORKSHOPS

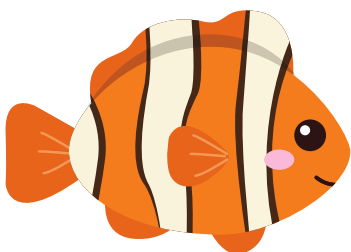

During the part of the zero waste activities we had several groups. A group that made Nutella, a wooden board and liquid bladder. These activities allowed us to realize that we can do everyday things without waste.

# TECHNICAL VISITS

During technical visits, we visited aquaponics. Their aquaponics consists of growing plant in water and once the water is used, the excess water goes into a tank with koi fish and the fish live inside the water. Bacteria and filters clean the water so it can be used for the plants. The aquaponic is still on an experimental scale and they want to do much bigger aquaponics

# CHALLENGES

## Building the wooden chair

Our task was to build a chair out of wooden planks by only using two pieces of rope. It was hard but after a lot of teamwork we managed to build it 🥳

first try... didn't go so well

second try, getting closer

## *Third time's the charm*

Even after many tries and fails, we have proven that our team doesn't give up easily and that we stick together even in hard times

## In Luxembourg city.

After arriving to Luxembourg city we got an app with a quiz which guided us through the city. We saw many sights like the statue of the golden women (Gëlle Fra).

# Landjugendaag

## **Station 1:**

Balancing cups filled with water while walking through a obstacle course.

## **Station 2 :**

We had to fill a barrel by sliding through a water slide and running up the hill with a bucket full of water, wich we collected

## **Station 4 :**

Climbing up the tree , by sticking the wooden planks - wich teammates have to bring - into the tree trunk

### Station 5:

We had to solve a puzzle while one person hangs in the air. The person is the only one who is allowed to touch the puzzle pieces. Other players of the group help moving the person to the puzzle pieces.
