

# NO TIME TO WASTE

Rosalie Jonkman, Tristan Kootstra, Dani Hokse, Stefan Dekker and Naomi Guichelaar

The Meppeler mosquito is a work of art that stands for less waste in nature.

The paper containers are outside.

The waste of the animals such as hay and straw is collected in a large container.

Waste wood and other waste from MBO and VMBO is collected in two containers behind the junior.

here are trash cans in every classroom, these are meant for residual waste.

Trash cans are scattered throughout the school. You must separate the waste.
