

Why Do You Need Teeth Whitening?

Numerous people across the globe are suffering from a stained and discolored dental condition which leads to hiding their discoloration and stain in front of people. Not many people are aware of the **dental deep cleaning** and teeth whitening services that are available by the [nearest dentist](#). It is essential to carry a beautiful smile as it shows self-confidence. Many people have lost their natural teeth color due to many reasons such as drinking coffee, red wine, and smoking cigarettes.

These habits deliver sturdy stains on a person's teeth which are not generally cleaned or whitened by teeth whitening for cleaning old stains and discoloration. It is important to visit the **Nearest Dental Clinic**. In this article, we have mentioned some core reasons which make your teeth stained and discolored for ages. Read this entire thought out for reducing the chances of making these mistakes.

What are the core causes that require teeth whitening?

We have mentioned some reasons that can cause stained and discoloration of a person's teeth below, so make sure to read these core causes carefully as these are some causes that require a search for **Teeth Bleaching Services**:

1. Drinks:

Many people are addicted to coffee, tea, and red wines which leads them to severe tooth staining and discoloration due to pigmentation(chromogens) that stick to the white and tooth

enamel. If you are one of the people then you should know it is important for you to get [teeth whitening near me](#).

2. Tobacco and Smoking:

If you are one of the people addicted to tobacco and cigarettes then you should know regular consumption of these drugs can make your teeth dark due to building stain tar.

3. Trauma or Injury:

Not many people believe but a stain and discoloration on teeth can also be caused by trauma and serious injury to a person's mouth. Trauma and injury can pull off dentin which enables the teeth discoloration under tooth enamel. Do make sure to visit the **best dentist near me** after injury in the mouth which helps you in preventing tooth discoloration in the early stage.

Does whitening work on all teeth?

Before visiting a dentist for **teeth bleaching near me** it is essential to have a talk with your dentist about teeth whitening procedures including a detailed introduction about teeth whitening kits and advanced solutions for fixing the discoloration. Your dentist will tell you if your teeth can be fixed with an advanced teeth whitening procedure or not because if you are suffering from dark yellow teeth condition that it can generally be fixed by teeth bleaching. But in case you are suffering from grey and brown discoloration of teeth, it will not go away with teeth bleaching. For whitening of these teeth, it is required a proper tooth cleaning procedure or dental veneers to hide the discoloration.

The Takeaways!

We hope you liked this article and now you know why it is important to consider a teeth whitening procedure from the dentist.
