

FOREST FIRES

The problem we want to defend is **forest fires**.

The natural cause is **volcanic eruption**, the human cause are **barbecue, stub and construction works**.

The consequence of the forest fires is **engendered species**, the risk is the **death of the people**, so the dangers is important.

The solution is nothing **drop of the dry ground**, don't pollution because the pollution to raise the heat, and the last possible solution is **don't use the car** because we have commun transport and the car polute.

Finally, **we using the communs transports**, we can take the wastes on the street and in the water.
