

HOW TO MAKE A POSTER

1. Find information about the topic

2. Make notes about the most important points : the poster information should be **concise** and **relevant**.

3. Group information into different sections

4. Choose the material you will use : cardboard – pencils – rubber – markers – felt-tip pens – illustrations – glue

5. **Plan the poster's layout** : make a sketch on a paper with a pencil.

There should be :

- 1 eye-catching title
- some subtitles : smaller than the title, using same letter style for all of them
- information texts : short text divided into sections, easy to read
- relevant images or drawings

6. Make your final poster, paying particular **attention to the texts** : make sure that they are made of **short** and **correct** sentences, **avoiding** spelling mistakes and **crossing-outs**.

Examples of poster organization :
