

## All gathered to demonstrate against the melting ice

-Melting ice is a very big problem for our planet, this is caused by global warming pollution greenhouse gases. The consequences are the rising waters the decrease of the earth which engenders overpopulation. The solution ultimate will be to decrease global warming

-This is why an event will be organized on Friday March 20 2020 the departure will be in front of lycée Louis Pasteur in Henin Beaumont all the lycées of the sector are invited there by bike then will be t-shirts distributed before departure because a tour cycling will be done. We will leave the lycée and we will cross the city in Henin Beaumont to take a walk along the water and then return to the lycée. We are waiting for you to demonstrate for our planet.
