

## Pollution in city

The cause we want to defend is litter, because there is a lot of pollution of nature in the city and the forest.

The causes of the problem are pollution exists because people throw their waste on the ground and not in the bin.

The consequences of the pollution are that waste decompose in nature and releases methanes and gases, which poisons the ground.

The solutions would it be like not to throw this waste on the ground anymore, to do this, we will create a citizen cleaning the 28/11/2022 at 01:00 PM. The place in Lens and to ask the city to repaint the bin for they are more see.  
( the bag of bin and the gloves will be distribues).
