

!!!Be better !!!Save the world !!!

Hello, we are Peter and Jhon the saviors of the planet ! The air that we breathe is corrupted, but you can change that! **Yes you**. The air is essential tool for the humanity, why don't we to preserve. We have to act. First of all, plane, cars , boats and camion to give out more CO2.It's a big threat for our zone layer. Imagine in **Australia zone layerhas missing !!** The poor, they can't go beach to tan.

Then, the factory pollutes even more air, because they use non-renewable energy like coal, petrolium... In china **you can't see the sky !!** a huge black cloud of pollution to hide the sun !!! Plenty of other problems exist, **but** you can change that. Publics.

To remedy we must use transport, do car-pooling, favour the bike and the foot...

Personaly, we have chose to help our athmosphere, our planet, we set up an an agency from carshare. **And you, What you do ??!**
