

HELP BELUGA

Beluga is species cetacean,
live in ocean Arctic and estuarine
Saint Laurent,
He disposed sonar the most
sophisticated at cetacean,
The sonar is indispensable for
positioned and to find ice canals,

Beluga disappeared because humans
fishing for skin in leather and eating
for white bear,
he is endangered species because ice
camp and your habitation naturalized is
destruction by humans

for help beluga, they are in fresh water and
the most hot because in environmental
naturalized because not survival othertime
risk to catch illness to which not exposed
habituals
