

# *Deforestation*

We would talk about deforestations. Its important for us. We defend deforestations because more and more forest hectars disappear but they are vital for our survival because they make us breathe and appropriate the environnemental balance.

Deforestations is the consequence of forest or field regression that can be the consequence of fire, a natural phenomene or shaving caused by human and the global warming.

Deforestations is principally cause by permanent use forest ground. Tree are cut by agricultural activity (73%) urbain expansion (10%), for install house (10%) and minor exploitation (10%).

We have lost almost 100 Million hectars of forest on the planet in two thousand years. Today the surface area on earth that was represented by the forest is 31,2 % while in 2020 it was 31,5 % so we lost 0,4 % forest area in 3 years. For example, Joe Biden voted the Willow Project which lost 8Million \$ for install barrel of oil on three sites of boring which will destroy many forest.

If people want to help us, they can use ecology website for example Ecosia. They use the money win for grow tree. Moreover people can cut down paper and stop production of palm oil.

We want to volunteer so we take action. Our action is to make a lot of cake. We love cooking. We sell cake of people live in Henin-Beaumont. Our goal is to collect money to grow tree in Henin-Beaumont. In Henin-Beaumont there are 25755 people so if half ( so 12000 ) purchase 1 cake which cost 2€ we collect 24000€ . To grow 1tree they use 100€ so with 24000 € we can grow 240 tree. We hope grow 240 tree in Henin-Beaumont.
