

The deforestation it's when the people cut massively tree. The Fao is responsible of 50 % the mondial's deforestation. There is the deforestation because we need for the mineral extraction, commercial agricultur, local subsistence farming, urban expansion and infrastructure expansion. The consequences for the deforestation, it's a desertification animals and human because nothing tree, certainly territories are uninhabitable since that is not tree. In to cut and to fire, we destroy Animals' habitation. Without tree,there is augmentation for the maladie.

If we construct without wood, we will cut less tree. If we plant trees they, will helps save energy. If we plant a tree reguly, we will help against the deforestation.

We action, It is to do a petition for ban the people of cut the tree, in Amazonia like Greta Thunberg or Xiuhtezcatl Martinez the past. Our generation will be theses who repared the world .
