

Oceans has become a bin !!

The problem is the sea pollution, the fish disappear by plastic made on the sea so they eat the plastic and die by boat pollution and they do illegal fishing. The coral disappears by pollution. The plastic is on the beach. We can see the biodiversity of the sea changes, so we must change and STOP the plastic pollution NOW !!!

I am going to do a manifestation to alert the government to save fish and oceans, rise every people of the world and we must boycott the fish market! Come with family or friends in Paris to react in front of the national assembly !!!
