2022/23 Study Year Abroad

Matt Wright

Freie Universität Berlin

- Founded in West Germany in 1948 as other major universities were in East Germany
- Name translates to "Freedom University"
- Nowadays partnered with HU and TU with many shared courses

- I studied as a physics student here for the 2022/23 year
- Requirements of what you must study are set by Bath, FU Berlin themselves have none
- I selected a variety of topics, some not even related to physics!

The city has great public transport and a wealth of markets/bars/clubs etc for great street/nightlife
