香港城市大學
City University of Hong Kong

David William Shanks

About CityU

- CityU was established as a university just 30 years ago.
- It is composed of 10 Schools / Colleges and 28 Academic Departments.
- It is ranked as the #1 Most International University in 2024 and #62 in the World University Rankings for 2025.
- CityU was the first university to develop and build a time-resolved aberration corrected environmental (TRACE) electron microscope.

Additional Info

CityU offers student accommodation to students for £1,000 a semester and also has 3 canteens located around the campus which provide HK style food for a great price. If you have any other questions please feel free to email me at dws30@bath.ac.uk.

What I Did at CityU

I am enrolled on the Mathematical Sciences with SYA course meaning that the majority of my modules were maths based. However, this also gave me the freedom to choose some gateway education courses such as Cantonese I, How the Brain Works and HK Basic Law.

What CityU Does Differently

CityU took a different approach to the standard final examinations accounting for 100% of the final grade. Instead, a lot of modules had quizzes and midterms which accounted for up to 25% of the final grade in total. This worked a lot better for me as it encouraged me to stay engaged all the way through the semester and not cram everything for the final exam. It also meant the final exams were less stressful, provided you did well in the quizzes / midterms.
