

DYCOTEC

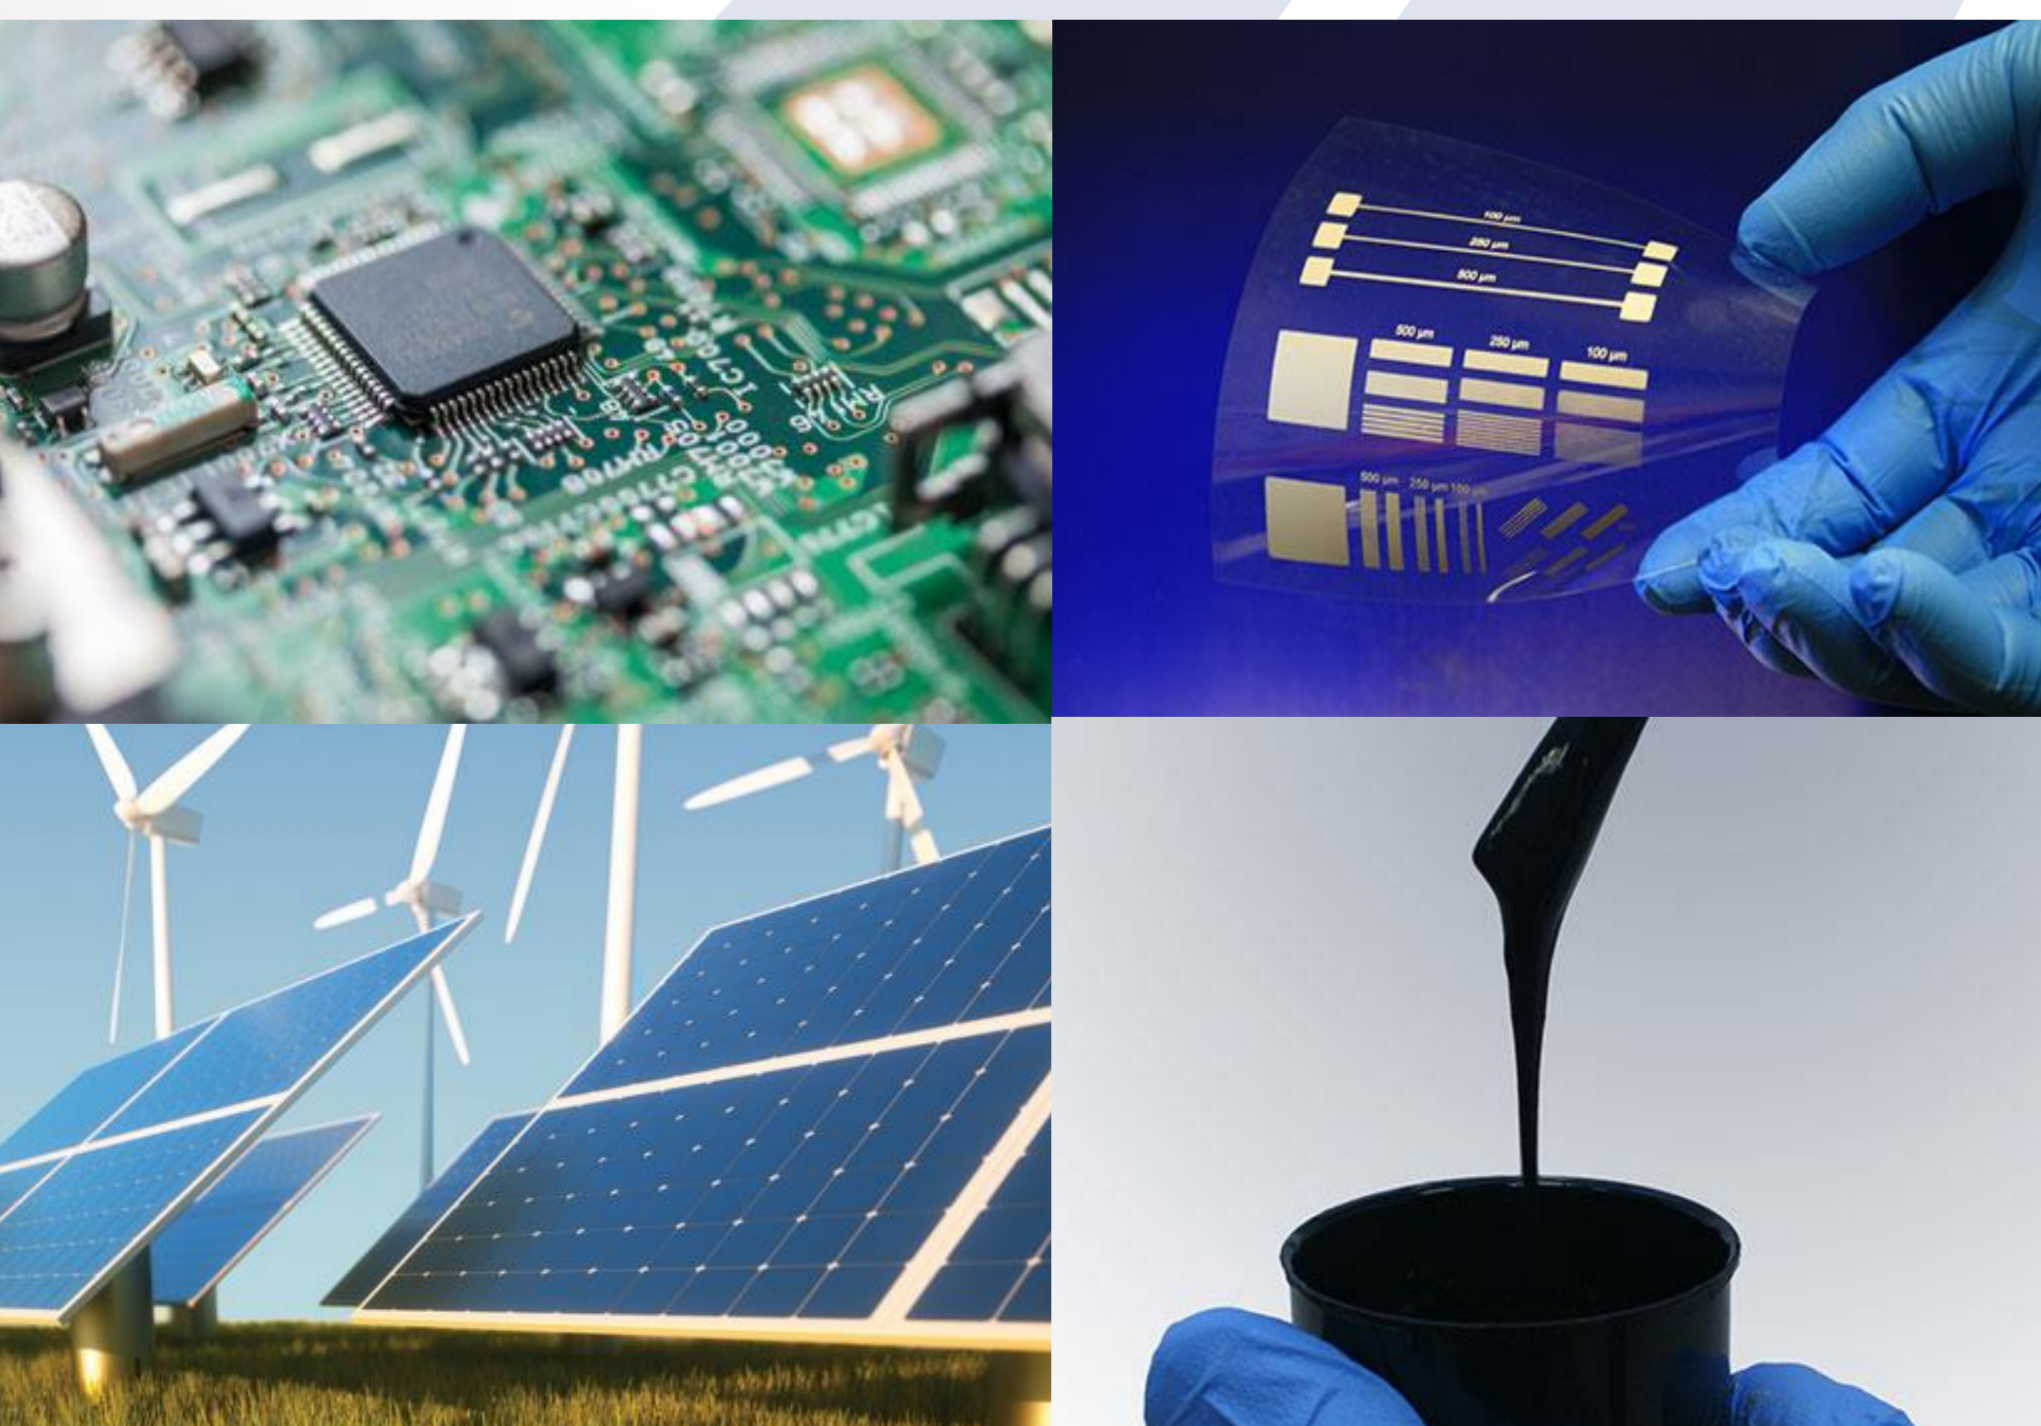

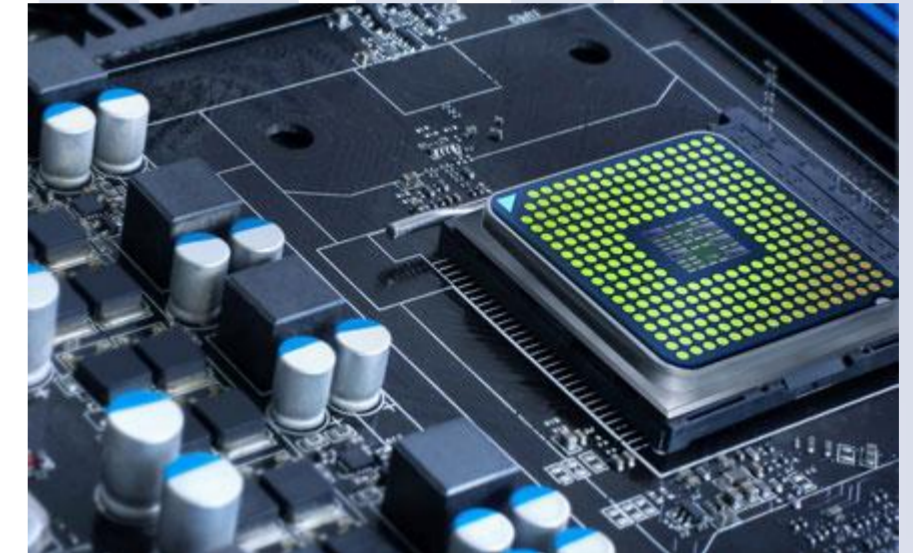

MATERIALS

Dycotec Materials Ltd is a small company that produces specialist inks and pastes for the printed electronics industry.

It is a young but rapidly growing company. The research and development at Dycotec Materials is cutting edge and takes place at a lab in **Swindon**.

Opportunities Include:

- Performing cutting edge research across **varying** aspects of chemistry.
- Designing and manufacturing specialist inks and pastes directly to **customer specification**.
- Gaining significant laboratory **experience**.
- Taking on **high responsibility** roles such as producing commercial products and training other staff or placement students.

Inks and pastes produced by Dycotec Materials are used most widely in products such as sensors, photovoltaic components and heaters.

These products are used in the transport, renewable energy and lighting industries among others.
