DALHOUSIE UNIVERSITY

- Over **21,000** students
- International students make up **23%** of the student population
- One of the **top 15** universities in Canada
- A **gold rating** in sustainability
- **200+** degree programmes available

BY ARIANNE DUNN, SYA 2022/23

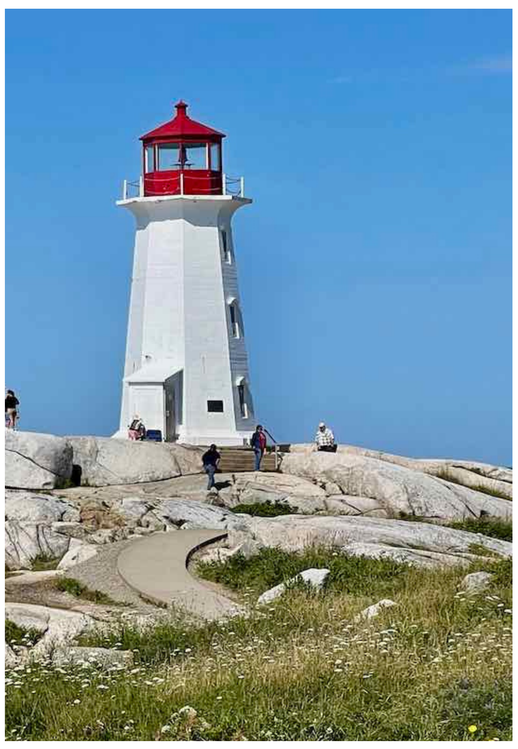

HALIFAX

- Halifax is the coastal capital city of Nova Scotia, a province located on the East coast of Canada.
- The city has a population of 422130 and is one of Canada's fastest-growing municipalities.
- It is host to the Halifax Citadel National Historic Site, which is the most visited national historic site in Canada.

ACCOMMODATION

- University accommodation is offered however it is not guaranteed
- Arrange beforehand to ensure a place to stay when you arrive in your host city
- There is a large student area surrounding the university,
- Most private accommodation within a 15-minute walk

TRANSPORT

- The university provides a bus pass included in fees which means you can get around the city for free
- Halifax is a relatively small city so most things are within walking distance

STUDENT LIFE

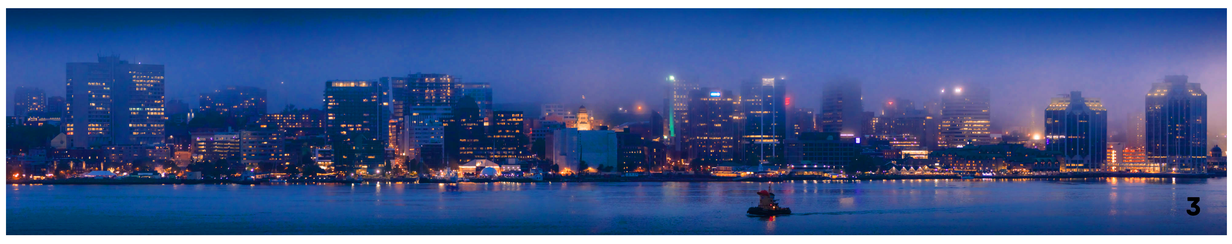

- Halifax is host to over 6 different universities meaning that the city has a large student population
- In the downtown area, there are lots of bars and pubs
- The university regularly hosts food, dance and international events
- Dalhousie provides a wide range of societies from surf to board game clubs meaning there is something for everyone!

THE UNIVERSITY

- Dalhousie provides a wide range of degree programmes
- 80% of my chosen modules were physics-based
- To meet Bath University's credit requirement you have to choose 5 courses per semester
- 20% of my modules were other interests including environmental science and philosophy

WHY CHOOSE TO STUDY ABROAD?

- It provides the opportunity to live in a different country in a structured environment with a great support system
- It allows you to experience different cultures
- It enables the experience of different teaching methods and a new university system

WHAT NEXT?

- I discovered my love for sustainability and environmental science
- I decided I wanted my career to be sustainability-focused
- I would consider moving abroad to work, as I have now found the confidence to move out of the UK again
