

and the pope had rewarded him with the title *Fidei Defensor*, Defender of the Faith. The pope must have regretted his action. The letters "F.D." are still to be found on every British coin.

Like his father, Henry VIII governed England through his close advisers, men who were completely dependent on him for their position. But when he broke with Rome, he used Parliament to make the break legal. Through several Acts of Parliament between 1532 and 1536, England became politically a Protestant country, even though the popular religion was still Catholic.

Once England had accepted the separation from Rome Henry took the English Reformation a step further. Wolsey's place as the king's chief minister was taken by one of his assistants, Thomas Cromwell. Henry and Cromwell made a careful survey of Church property, the first properly organised tax survey since the Domesday Book 450 years earlier. Between 1536 and 1539 they closed 560 monasteries and other religious houses. Henry did this in order to make money, but he also wanted to be popular with the rising classes of landowners and merchants. He therefore gave or sold much of the monasteries' lands to them. Many smaller landowners made their fortunes. Most knocked down the old monastery buildings and

used the stone to create magnificent new houses for themselves. Other buildings were just left to fall down.

Meanwhile the monks and nuns were thrown out. Some were given small sums of money, but many were unable to find work and became wandering beggars. The dissolution of the monasteries was probably the greatest act of official destruction in the history of Britain.

Henry proved that his break with Rome was neither a religious nor a diplomatic disaster. He remained loyal to Catholic religious teaching, and executed Protestants who refused to accept it. He even made an alliance with Charles V of Spain against France. For political reasons both of them were willing to forget the quarrel over Catherine of Aragon, and also England's break with Rome.

Henry died in 1547, leaving behind his sixth wife, Catherine Parr, and his three children. Mary, the eldest, was the daughter of Catherine of Aragon. Elizabeth was the daughter of his second wife, Anne Boleyn, whom he had executed because she was unfaithful. Nine-year-old Edward was the son of Jane Seymour, the only wife whom Henry had really loved, but who had died giving birth to his only son.

The ruins of Fountains Abbey in Yorkshire, one of the greatest and wealthiest English monasteries. It finally surrendered to Henry's reformation in 1539. The stained glass and lead window frames and roofing were removed immediately. But it was not until 1611 that some of the stone was taken to build Fountains Hall, nearby. Even so, the abbey was so huge that most of the stone was never taken and the abbey survived as a ruin.
