

Enigmes mathématiques 2

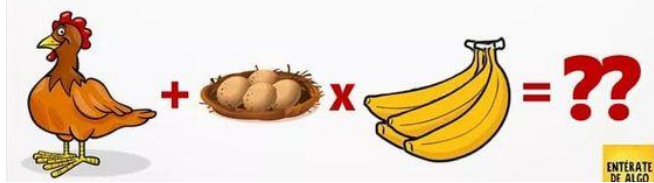

$$60 = 20 \times 3 \text{ donc la poule} = 20$$

$$26 - 20 = 6 \quad 6 = 2 \times 3 \text{ donc 3 œufs} = 3$$

$$15 - 3 = 12 \quad 12 = 6 \times 2 \text{ donc les bananes} = 6$$

$$20 + 3 \times 6 = 20 + 18 = 38$$

Can You Solve This?

$$= 30$$

$$30 = 10 \times 3 \text{ donc le chat} = 10$$

$$= 22$$

$$22 + 10 = 32 \quad 32 = 16 \times 2 \text{ donc le cochon} = 16$$

$$= 11$$

$$16 - ? = 11 \quad \text{il manque } 5 \text{ donc le cheval} = 5$$

$$= ?$$

$$10 + 16 + 5 = 31$$
