

## FLOWERS FOR ALGERNON – Daniel Keys

As a member of a medical committee, you have been asked to pronounce yourself on the study Charlie / Algernon by Dr Nemur and Dr Strauss, which was conducted some 10 years ago. Should the experiment, based on Charlie Gordon's work, be reconducted or not? To that purpose, you will listen to the Board of Committee of the Greenwich Hospital and vote.

You have before hand studied the case through a file (to be returned to your teacher) with the following elements:

**1- progress report 1 -> progress report 7:** short introduction to Charlie: biography + personality test / Maze / rochsach results

**2- progress report 8 -> progress report 9:** letter from Charlie to uncle Herman in which he explains what is happening to him (graded)

**3- progress report 10 -> progress report 11:** audio testimony : Mr Donner – Gimpy – Alice – Dr Nemur – Dr Strauss are questioned on this particular moment of Charlies' life (graded- you may print your QR code and add it to your file)

**4- progress report 12 -> progress report 13 :** write your favorite quote from either progress report. Be ready to explain why you liked this moment (orally)

**5- progress report 14 -> progress report 15 :** maze done for Algernon + Fay's Rochsach or personality tests

**6-progress report 16 -> progress report 17:** Nemur or Alice's concern about Charly => you may either write your concerns or send an audio (graded)
