

Multiplying Fractions - Arrays

1)

This illustration shows 12 pentagons divided equally into 3 rows.

$$\frac{1}{3} \text{ of } 12 = \text{number of pentagons in each row} = \underline{\hspace{2cm}}$$

$$\frac{2}{3} \text{ of } 12 = \text{number of pentagons in 2 rows}$$

$$\frac{2}{3} \times 12 = \underline{\hspace{2cm}} \text{ pentagons}$$

2)

divided equally into 6 rows.

$$= \underline{\hspace{2cm}}$$

3)

divided equally into 4 rows.

$$w = \underline{\hspace{2cm}}$$

4)

This illustration shows 10 circles divided equally into 5 rows.

$$\frac{1}{5} \text{ of } 10 = \text{number of circles in each row} = \underline{\hspace{2cm}}$$

$$\frac{4}{5} \text{ of } 10 = \text{number of circles in 4 rows}$$

$$\frac{4}{5} \times 10 = \underline{\hspace{2cm}} \text{ circles}$$
